

## Accessories for PMI knobbed rolls

After placing, the PMI knobbed rolls are held by the pressure of the soil.

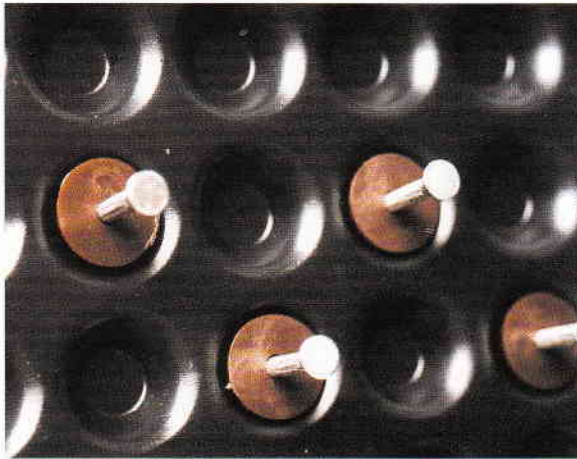

The PMI assembly accessories offer further advantages and support:

### PM-Edging

The edging is used as an upper edge stopper. It avoids stones and soil falling behind the knobbed rolls.

material:	HDPE
colour:	dark-grey
length:	2.00 m
deliverable form:	as requested

### PM-Assembly buttons with steel nails

The steel nails are used for efficient fixing of the knobbed rolls on concrete and masonry. Stretching of the knobbed rolls is avoided.

material:	assembly button: HDPE nail: steel, tempered, electrogalvanized
size:	suitable for the knobbed roll of 8 mm height,
colour:	black and brown
deliverable form:	packs of 100 pieces

### PM-Adhesive tape

The double-face tape PM is used for a better sealing of the overlaps. It avoids cold bridges and moisture migrations.

material:	adhesive: butyl rubber support: PE
colour:	black
deliverable form:	as requested

### Our product range:

- Knobbed rolls in various versions
- Construction accessories
- Stonework-barriers
- Pipe coatings
